## Introduction

Computer Science graduate with a strong interest in Data Science, Analytics, and Software Development. Passionate about transforming data into actionable insights using Python, SQL while building scalable software solutions. Experienced in developing data-driven projects, performing exploratory data analysis, and creating responsive web applications. A quick learner with strong problem-solving abilities, eager to contribute technical expertise and continuously expand knowledge in modern data science and software engineering practices.

## Technical Skills

**Programming Languages:** Python, SQL, C++, JavaScript

**Web Technologies:** HTML, CSS

**Databases:** MySQL

**Data Science:** Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn

**Developer Tools:** Git, GitHub, Visual Studio Code, Jupyter Notebook

## Projects

**Customer Churn Reduction Analysis** | Python, SQL, Pandas, NumPy, Matplotlib, Seaborn

2026

- Developed a data-driven customer churn analysis pipeline to identify key factors influencing customer retention.
- Built a scalable SQL-to-Python workflow for extracting, cleaning, and analyzing customer subscription data.
- Performed feature engineering to derive customer tenure and churn-risk indicators for deeper analysis.
- Created visualizations and dashboards to communicate insights and provide actionable retention recommendations.

**End-to-End Pizza Sales Data Analysis** | MySQL, SQL, CTEs, Window Functions

2026

- Designed and implemented a relational MySQL database by importing and organizing multiple pizza sales datasets.
- Used SQL joins, Common Table Expressions (CTEs), and window functions to analyze sales performance and customer ordering behavior.
- Calculated key business metrics including total revenue, cumulative revenue, average daily sales, and peak ordering hours.
- Identified top-performing pizzas and category-wise revenue trends to support inventory and business decision-making.

**Interactive Product Filtering System** | JavaScript

2026

- Developed a responsive product filtering application with a clean and intuitive user interface.
- Implemented dynamic category-based filtering using JavaScript to improve product discovery.
- Applied DOM manipulation techniques for real-time updates without page reloads.
- Optimized the interface for seamless performance across desktop and mobile devices.

## Education

**Technocrats Institute of Technology**

2021 – 2025

*B.Tech in Computer Science CGPA: 7.58*

Bhopal

**DAV Centenary Public School**

2020

*CBSE Class XII Percentage: 82%*

Dhanbad

**TATA DAV Public School Jamadoba**

2018

*CBSE Class X Percentage: 78%*

Dhanbad

## Internship

**Ramraj Technology Solutions Pvt. Ltd.**

2023

*AWS Cloud Practitioner Intern*

Bhopal

- Learned AWS cloud fundamentals and foundational cloud architecture concepts through industry-oriented training.
- Developed a practical understanding of core AWS services, cloud deployment models, and cloud computing principles.
- Strengthened knowledge of cloud infrastructure, resource management, and best practices for scalable cloud solutions.
